Technical Skills

- Languages: Javascript
- Framework/Lib: Express. js, Next. js, React.js
- Back End: Node.js, Express. js, Mongoose
- Front End: HTML, CSS, JavaScript, ejs, React. js, Next. js, Redux Toolkit, tailwind css
- Database: MySQL, MongoDB
- Tools: Github, Postman

Projects

- **React Project: Password Manager**

  React project: Password Manger Using React, Tailwind, MongoDB & Express give me Description

  Here is a short and professional project description you can use in resume, LinkedIn, or portfolio.

  Password Manager (React, Tailwind, MongoDB, Express)
  A secure Password Manager web application built using React, Tailwind CSS, Node.js, Express, and MongoDB that allows users to store and manage their login credentials in one place. The application provides features to add, view, edit, and delete website credentials with a clean and responsive user interface.

  The backend API built with Express.js handles secure data storage and communication with MongoDB, while the frontend developed with React and Tailwind CSS ensures a fast and modern user experience. The project demonstrates full-stack development, REST API integration, CRUD operations, and responsive UI design.

  Key Features:

  Add and store website credentials

View saved passwords securely

Edit and delete stored credentials

Responsive UI with Tailwind CSS

RESTful API with Express.js

MongoDB database integration

Technologies Used:
React.js, Tailwind CSS, Node.js, Express.js, MongoDB, REST API

- **URL Shortener Using Next.js**
  A URL Shortener web application developed using React.js that allows users to convert long URLs into short, shareable links. The application provides a simple and user-friendly interface where users can quickly generate shortened URLs and manage them efficiently.

  The project demonstrates React fundamentals, including component-based architecture, state management, API integration, and responsive UI design. It highlights the ability to build practical tools that improve link sharing and tracking.

  Key Features

  Convert long URLs into short links

  Fast and responsive user interface

  Copy shortened links easily

  API integration for URL shortening service

  Clean and modern UI built with React

  Technologies Used
  React.js, JavaScript, HTML5, CSS3, REST API
